

Keeping track of concrete test results is critical in developing optimized mixes and preparing submittals. In this hands-on training class, attendees will learn about the following topics.

### **Introduction to**

### **COMMANDqc Interfaces – Dispatch/Batch**

### **Concrete Tests & Laboratory Setup**

### **Concrete Tests & Basic Reports**

- Creating Samples
- Retrieving Samples
- Specimen Testing (Data Entry and Report)
- Test Details by Specimen Report

### **Printing Test Certificates**

### **Concrete Strength Performance Analysis**

- Strength Performance Report
- Using the grid report
- Generating graphs from the grid

### **Combined Laboratory & Production Analysis**

### **Reporting/Analysis Examples**

### **Creating & Editing**

- Mix Design Reports
- Adding a Strength Performance Report to a Mix

### **Creating a Grading Analysis Report**
